

INSTALLATION OF DOCKER CLI

DATE	07 NOV 2022
TEAM ID	PNT2022TMID10774
PROJECT NAME	CUSTOMER CARE REGISTRY

Step 1:

STEP 2:

2. Install with powershell.exe

NOTE: Please inspect <https://chocolatey.org/install.ps1> prior to running any of these scripts to ensure safety. We already know it's safe, but you should verify the security and contents of *any* script from the internet you are not familiar with. All of these scripts download a remote PowerShell script and execute it on your machine. We take security very seriously. [Learn more about our security protocols.](#)

With PowerShell, you must ensure `Get-ExecutionPolicy` is not `Restricted`. We suggest using `Bypass` to bypass the policy to get things installed or `AllSigned` for quite a bit more security.

- Run `Get-ExecutionPolicy`. If it returns `Restricted`, then run `Set-ExecutionPolicy AllSigned` or `Set-ExecutionPolicy Bypass -Scope Process`.

Now run the following command:

```
Set-ExecutionPolicy Bypass -Scope Process -Force; [System.Net.ServicePointManager]::SecurityProtocol = [System.Net.ServicePointManager]::SecurityProtocol -bor 3072; iex (<curl https://chocolatey.org/install.ps1)
```

3. Paste the copied text into your shell and press Enter.

4. Wait a few seconds for the command to complete.

5. If you don't see any errors, you are ready to use Chocolatey! Type `choco` or `choco -?` now, or see [Getting Started](#) for usage instructions.

Chocolatey Licensed Install:

> you also installing a commercial edition of Chocolatey?

please see [Install the Licensed Edition](#).

Advanced Chocolatey Install:

> you installing behind a proxy, need a completely offline install, or wanting to install a licensed edition of Chocolatey? Need even more options? Visit [Chocolatey Documentation](#) or take our new [Installation Course](#) to help you get up and running with Chocolatey!

Option 1:
[Read the Documentation](#)

Option 2:
[Take the step-by-step Installation Course](#) NEW!

STEP 3:

```
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell https://aka.ms/powershell

PS C:\Windows\system32> choco install docker

Chocolatey v0.39.10
Installing the following packages:
docker-cli
By installing you accept licenses for the packages.
docker-cli v19.03.10 already installed.
See --force to reinstall, specify a version to install, or try upgrade.

Chocolatey installed 0/1 packages.
See the log for details (C:\ProgramData\chocolatey\logs\chocolatey.log).

Warnings:
 - docker-cli - docker-cli v19.03.10 already installed.
   See --force to reinstall, specify a version to install, or try upgrade.

Notes: Using Chocolatey! Features like locking licenses are false here.
See https://aka.ms/chocolatey for more details.
```

STEP4:

```
Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell https://aka.ms/powershell

PS C:\Windows\system32> choco install docker

Chocolatey v0.39.10
Installing the following packages:
docker-cli
By installing you accept licenses for the packages.
docker-cli v19.03.10 already installed.
See --force to reinstall, specify a version to install, or try upgrade.

Chocolatey installed 0/1 packages.
See the log for details (C:\ProgramData\chocolatey\logs\chocolatey.log).

Warnings:
 - docker-cli - docker-cli v19.03.10 already installed.
   See --force to reinstall, specify a version to install, or try upgrade.

Notes: Using Chocolatey! Features like locking licenses are false here.
See https://aka.ms/chocolatey for more details.
```

STEP 5:

STEP 6:
